**Subject:** RE: 10 CFR 2.206 Pre-Meeting Call and Requested Letter (G20130776; MF3031)

I'll see if I can find the criteria used for the dams selected to be analyzed for Columbia. Thanks, Fred

Hi Fred,

There are a number of Canadian dams on this map that don't seem to be in the list you gave me. Thanks! -  
Chuck

Hi Fred,

Thank you for the documents and the explanation earlier today. I don't see the Mica Dam listed. Are none of the Canadian dams on the mainstem of the Columbia River being looked at for this study? Thank you!

Chuck

Mr. Johnson, as you requested, attached is the EN letter to NRC requesting USACE assistance. It is publicly available.

Energy Northwest is requesting that the USACE perform dam failure analyses for all upstream dams listed in FSAR Table 2.4-1. Additionally, Energy Northwest is requesting that the USACE perform dam failure analyses for the following upstream dams, which are not addressed in FSAR Table 2.4-1:

Noxon Rapids

Revelstoke

Post Falls Middle Channel

O' Sullivan

North

Corra Linn

In addition, I spoke with Merrilee regarding additional participants on the pre-meeting call with the Petition Review Board. Petitioners have had other participants on the phoncon, and the POC (that's you) typically coordinates them, e.g., names, sequence, time allotment. The phoncon is limited to 1 hour, with about 45-50 minutes total for the petitioners; the rest for NRC comments.

I'll need to know about how many participants you expect, so that I know the number of telephone lines to reserve. It was good to finally make contact with you.

I've also been informed that I can provide you with the NRC's "Determination of Immediate Safety Concerns," which I've attached, regarding your 10/31/13 letter. It provides the NRC's reasoning for not immediately shutting down Columbia while your petition is considered. The determination was approved by the Deputy Director of the NRC Office of Nuclear Reactor Regulation, Jennifer Uhle, on December 23, 2013.

Thanks, Fred Lyon,

NRR project manager for Columbia Generating Station, et al.
