Enclosure 3 of Reference 1 provided SCE's commitments for implementation of the Phase 2 and 3 mitigating strategies for B.5.b.

The Enclosure provided in Reference 2 provided a summary of commitment changes for implementation of the Phase 2 and 3 mitigating strategies for B.5.b. following the permanent shutdown and defueling of the San Onofre Nuclear Generating Station Unit 3 and Unit 2 (per References 3, 4 and 5, respectively).

Further assessment of the Phase 2 and 3 mitigating strategies commitments for B.5.b proved the need to remove certain job/position descriptions and equipment descriptions. These description changes are required due to the staffing changes following the permanent shutdown of the San Onofre Nuclear Generating Station and are not changes to the overall B.5.b strategy. A summary of the changes to these commitments and the evaluation per Nuclear Energy Institute (NEI) "Guidelines for Managing NRC Commitment Changes," NEI-99-04, Revision 0 is provided in the following attachments to this Enclosure:

Attachment 1 SFP strategies described in Tables A.2-1 through A.2-6

Attachment 2 PWR strategies described in Tables A4-1 through A.4-7
