comments: 1.) I reject NRC's waste confidence Draft Generic Environmental Impact Statement (DGEIS), and ask NRC to withdraw it for thorough revision. I have NO confidence in NRC's "waste con-fidence"!

2.) I believe that no industry should be allowed to continue creating wastes it has no ability to dispose of. Since neither the nuclear industry nor the Federal Government has an operating spent-fuel/high-level radioactive waste disposal facility in operation, it should not be allowed to manufacture any more of these wastes.

3.) NRC should not be allowed to issue new reactor licenses, nor grant license extensions to old operating reactors until a permanent, deep- geological high-level radioactive waste disposal facility is built and operating.

4.) No state is a waste dump! I don't want any more high-level radioactive wastes coming "to or through" my state. I do not want to see more high-level, long-lived radioactive waste coming to proposed so-called "centralized interim storage" waste facilities (a.k.a., "parking lot dumps") here or anywhere else.
