License No.: DPR-43

**DOMINION ENERGY KEWAUNEE, INC.**  
**KEWAUNEE POWER STATION**  
**INSPECTION REPORT 05000305/2013008 – RESPONSE TO NRC REQUEST**

On March 4, 2013, the Nuclear Regulatory Commission (NRC) issued an inspection report for the Kewaunee Power Station (KPS) (Reference 1) indicating a preliminary significance determination for a White finding for fire brigade activities. On April 30, 2013, the NRC issued the final significance determination for a White finding and notice of violation (Reference 2). The April 30, 2013 letter (Reference 2) also informed Dominion Energy Kewaunee, Inc. (DEK) the NRC would be conducting a supplemental inspection using Inspection Procedure 95001, "Inspection for One or Two White Inputs in a Strategic Performance Area," when NRC has been notified by DEK of its readiness for the inspection.

On May 31, 2013, the NRC issued a letter describing the termination of the Reactor Oversight Process for KPS and commencement of the Decommissioning Power Reactor Inspection Program (Reference 3). In that letter the NRC states that it will conduct the inspection for the fire brigade finding using Inspection Procedure 92702, "Follow-Up on Corrective Actions for Violations and Deviations," to verify appropriate corrective actions are being implemented instead of using Inspection Procedure 95001.

DEK has undertaken the steps necessary to assure that the cause evaluation and corrective actions are of sufficient scope and breadth to address the identified performance deficiencies. DEK requests the NRC perform the inspection identified in Reference 3 starting on or after January 20, 2014.

If you have questions or require additional information, please feel free to contact Mr. Richard P. Repshas at 920-388-8217.

Very truly yours,

A handwritten signature in black ink, appearing to read "A. J. Jordan", with a long horizontal flourish extending to the right.

A. J. Jordan  
Site Vice President, Kewaunee Power Station

IEDI  
NRR
