Dallas, Texas 75247

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 42-29407-01

By NRC Form dated January 8, 2014, you informed the U.S. Nuclear Regulatory Commission (NRC) that Rone Engineering Services, Ltd., wished to terminate NRC radioactive materials license number 42-29407-01. The NRC Form 314 states that all activities authorized under this license have ceased, and that all radioactive material possessed by the licensee under this license will continue to be used under the State of Texas radioactive materials license L02356.

The NRC staff has reviewed the statements made in your NRC Form 314 and the results of the June 2011 inspection. Your NRC license only authorizes work at temporary job sites in NRC jurisdiction and no field stations are identified in your license. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material is no longer stored or used in NRC jurisdiction. Therefore, no decommissioning documentation is needed.

Please find enclosed Amendment No. 01 to License No. 42-29407-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(ii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

**/RA/**
