ATTN: Rulemakings and Adjudications Staff

Dear Sirs:

I am writing to support the NRC's Spent Fuel Storage Rule. PG&E has been a vital and crucial part of the community here on the Central Coast of California for decades with an impeccable safety record.

I believe that with NRC oversight PG&E has a very detailed and successful spent fuel management program that continues to safely store fuel via both its wet and dry cask storage systems. I am confident that with multiple layers of safeguards in place stored spent fuel is being handled in a safe manner.

However, the Department of Energy has a responsibility to make good on its commitment to receive and safely store the spent fuel for the long term. By doing so, locally stored spent fuel could be safely removed to single or regional locations controlled by and protected by our national government. I believe it has a duty to do so and encourage them to live up to the commitment they made.

Thank you for your consideration.
