Re: Material License No. 06-28106-01 / 030-30237

This letter is being sent to verify that Connecticut Resources Recovery Authority (CRRA) had requested in correspondence dated 1/24/2008 the cancellation of Specific License (06-28106-01) for the nuclear devices no longer in service or in our possession. Currently, any remaining devices at our facility are covered under an NRC General License, which is prepared and submitted annually.

The original Specific License had an expiration date of 12/31/2013. As discussed, CRRA does not need to renew the Specific License by 12/31/2013. CRRA is requesting a follow up letter from the NRC stating that the Specific License has been cancelled and no further action is required by CRRA.

Thank you,

A handwritten signature in black ink that reads "John Romano". The signature is fluid and cursive, with the first name "John" being more prominent.

John Romano
