NINE MILE POINT
NUCLEAR STATION

January 6, 2014

U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

ATTENTION: Document Control Desk

SUBJECT: Nine Mile Point Nuclear Station, Units 1 and 2
Renewed Facility Operating License Nos. DPR-63 and NPF-69
Docket Nos. 50-220 and 50-410

Changes to the Nine Mile Point Nuclear Station Physical Security, Safeguards
Contingency, and Security Training and Qualification Plan

REFERENCE: (1) Letter from K. Clark (NMPNS) to Document Control Desk (NRC), dated
February 6, 2013, Changes to the Nine Mile Point Nuclear Station Physical
Security, Safeguards Contingency, and Security Training and Qualification Plan
– Response to NRC Request for Additional Information

Pursuant to the requirements of 10 CFR 50.54(p), attached are the changed pages for Issue 8, Revision 2, of the Nine Mile Point Nuclear Station Physical Security, Safeguards Contingency, and Security Training and Qualification Plan (the Plan). A summary of changes containing Security-Related Information for withholding from public disclosure per 10 CFR 2.390 is provided in Attachment 1. The revised pages of the Plan, which is classified as Safeguards Information, are provided in Attachment 2.

This revision of the Plan captures a clarification in Section 15.1, "Illumination," to which Nine Mile Point committed in Reference (1). Other changes incorporated in this revision include a new type of intrusion detection equipment employed along the protected area barrier, a limited modification to the vehicle barrier system, and removal of two locations from the vital area list at Unit 1.

Nine Mile Point Nuclear Station, LLC has reviewed the changes in this revision of the Plan in accordance with applicable site procedures and determined that they do not decrease the effectiveness of the Plan or the overall Nuclear Security Program for the site.
