The NRC Special Authorization Approval for Shipment Using the Model No. 2000 Package (Reference 3) has an expiration date of January 31, 2014. As discussed with NRC Spent Fuel Storage and Transportation staff on January 10, 2014, the upcoming radioactive material shipment originally planned for mid-January 2014 has been delayed due to severe winter weather at the customer site.

As a result, GEH is requesting an extension of this authorization until February 28, 2014. All other conditions in the Special Authorization remain the same.

If you have any questions regarding this, please contact me at 910-819-5950.

Sincerely,

Scott P. Murray, Manager
Facility Licensing
