The inventory provides information on service contract actions over \$25,000 that were awarded in FY 2013. The information is organized by function to show how contracted resources are distributed throughout the agency.

The inventory contains the following data:

1. A description of the services purchased;
2. The total dollar amount obligated for the services under the contract, and the funding source for the contract;
3. The contract type and date of the award;

4. The name of the contractor and place of performance;
5. Whether the contract is a personal services contract; and
6. Whether the contract was awarded on a non-competitive basis.

The NRC will analyze the data in the inventory for the purpose of determining if its contract labor is being used in an effective and appropriate manner and if the mix of federal employees and contractors in the agency is effectively balanced. The NRC developed the inventory by pulling data from the Federal Procurement Data System—Next Generation. The inventory does not include contractor proprietary or sensitive information.
