Mike/Mike:

I completed review of the information in the technical report (TR) ANP-10295P and changes in Revision 5. I compared the various changes in Revision 4 and Reversion 5 (July 2013) of the DCD to understand their significance to security. I conclude that the changes in Reversion 5 of the DCD will not impact the design

bases and assumptions in the most recently revised TR ANP-10295P (April 2013). I will not need to update the current input captured in the SE with no O/I for Section 13.6 and there will not be any supplemental RAIs.

Please provide this feedback at the meeting today. You can also provide ahead up to AREVA attendees for the meeting this afternoon so that they can adjust their plans accordingly. I will plan to attend or call in today.
