Johari--

Per your request dated 12/26/13, please see the attached and revised Table 1. Drill Hole Survey Summary from the Ross Technical Report, Addendum 2.6-E. We do not intend for the attached table to replace the table provided in the application but believe this is a suitable format to provide updated drillhole and re-abandonment information you have requested. Please let me know if you have any questions. Take care.

Ben

Ben,

In order to support the NRC's finalization of the comment response report for the Ross Project final SEIS, please provide the following information if it is available:

How many previous drillholes are believed or known to exist on the Ross Project site and the Lance District. How many of these holes have been located and plugged to date (May 9, 2013) by Strata.

Thank you,

Johari A. Moore
