ULNRC-05935, "Ameren Missouri 180-Day Seismic Walkdown Response to NRC Letter, "Request for Information Pursuant to Title 10 of the Code of Federal Regulations 10 CFR 50.54(f) Regarding Recommendations 2.1, 2.3, and 9.3, of the Near Term Task Force Review of Insights from the Fukushima Dai-Ichi Accident," dated November 27, 2012

On March 12, 2012, the Nuclear Regulatory Commission (NRC) issued Reference 1 to Ameren Missouri. Enclosure 3 of Reference 1 contains specific Requested Actions, Requested Information, and Required Responses associated with Recommendation 2.3: Seismic.

For Seismic Recommendation 2.3, Enclosure 3 of Reference 1 states that within 180 days of NRC endorsement of the walkdown guidance (Reference 2), each addressee will submit its final response for the requested information, including a list of any areas that are unable to be inspected due to inaccessibility and a schedule for when the walkdown will be completed.

On November 27, 2012, Ameren Missouri provided the Callaway Plant Seismic Walkdown Report (Reference 3) in response to the request of Reference 1 for Seismic Recommendation 2.3. In that submittal, Ameren Missouri noted that some areas were inaccessible for inspection. As a result, Ameren Missouri committed to provide a supplement to the Seismic Walkdown Report that contains the supplemental seismic walkdown results.

Enclosure 1 to this letter provides the results of the supplemental seismic walkdowns of inaccessible components. This submittal demonstrates compliance to the requirements of EPRI Technical Report 1025286 (Reference 2), and therefore meets the intent of Enclosure 3 to NRC 50.54(f) letter (Reference 1).

This letter does not contain new commitments.

If you have any questions concerning the content of this letter, please contact Scott Maglio, Regulatory Affairs Manager, at 573-676-8719.

Sincerely,
