PROFESSIONAL HISTORY

2002 – Present

Consultant

Provided consulting services and expert testimony to clients on issues related to nuclear insurance, Nuclear Regulatory Commission (“NRC”) decommissioning funding assurance requirements, NRC financial qualifications requirements for its power reactor licensees, and foreign ownership, control, or domination requirements.

Clients have included: Nuclear Mutual Limited; the Nuclear Energy Institute; and private national law firms. Nuclear power industry clients have included: Boston Edison Co.; Constellation Energy, Inc.; Consolidated Edison, Inc.; Dominion Resources, Inc.; Exelon Corporation; Louisiana Energy Services, Inc.; and Nuclear Innovation North America.

1997 – 2002

Senior Licensee Financial Policy Advisor Office of Nuclear Reactor Regulation U.S. Nuclear Regulatory Commission

Served in the Senior Level System (SLS) as the NRC’s expert in its financial and economic programs relating to its nuclear power plant licensees. These programs included: the financial qualifications of licensees to operate and decommission their nuclear plants safely; nuclear liability and property insurance; antitrust; utility deregulation and license transfers; foreign ownership, control, or domination issues; and other programs. I was responsible for developing and implementing the policies, regulations, and guidance with respect to these programs. In that capacity, I technically supervised a staff of 5 to 7 financial, insurance, and cost-benefit analysts.

I have a national reputation in the areas of my expertise and have been an invited speaker at numerous conferences, workshops, and other venues.

On May 31, 2002, I retired after 31 years with the NRC and its predecessor, the Atomic Energy Commission (“AEC”).

1971 – 1997

Various Positions

Served as an AEC Management Intern (1971 – 1973), NRC financial analyst (1973 – 1989), and then as the NRC’s senior analyst (1989 – 1997) in its financial and economic

programs as discussed above. In these various capacities, I was responsible for developing the NRC's policies, regulations, and guidance with respect to decommissioning funding assurance, amount of retrospective premium assessments under the Price-Anderson system, and the NRC's program for post-accident recovery insurance, among other programs. Beginning in 1995, I had lead responsibility for developing the NRC's financial qualifications policies, regulations, and guidance in response to the economic deregulation of the electric utility industry.

EDUCATION

Bachelor of Arts in Economics

1968

Drew University
Madison, New Jersey

Master of Public Administration

1971

Ohio State University
Columbus, Ohio
