Attention: Mr. John F. O'Leary, Director

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

On February 20, 1974, the California Coastal Zone Conservation Commission authorized the construction of San Onofre Nuclear Generating Station, Units 2 and 3. That authorization is embodied in Permit No. 183-73, dated February 28, 1974, and includes certain conditions which the Applicants, Southern California Edison Company and San Diego Gas and Electric Company, have agreed to comply with. The California Coastal Zone Conservation Commission has concluded that the construction of San Onofre Nuclear Generating Station, Units 2 and 3, as conditioned by Permit No. 183-73, "would not have any substantial adverse environmental or ecological effects and would be consistent with the findings, declarations, and objectives of the California Coastal Zone Conservation Act of 1972."

In consideration of the fact that the Southern California Edison and San Diego Gas and Electric Companies have agreed to comply with certain conditions in the construction of San Onofre Nuclear Generating Station, Units 2 and 3, in addition to those conditions contained in the U.S. Atomic Energy Commission's construction permits CPPR-97 and CPPR-98, this letter forwards, as an enclosure, details concerning the means by which the companies intend to comply with the conditions of Permit 183-73. Compliance with these conditions has not required a change in either the design criteria or implementation of those criteria (e.g. plant layout) with respect to the power block or safety-related systems described in the Preliminary Safety Analysis Report for San Onofre Nuclear Generating Station, Units 2 and 3. A copy of Permit No. 183-73 is also enclosed for your information and reference.

Three originals and forty (40) copies of this submittal are herewith provided.

Very truly yours,

2524
