Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

On March 10, 1978, Southern California Edison (SCE) and our consultants met with members of the NRC Staff from the Office of Inspection and Enforcement (I&E) and Nuclear Reactor Regulation (NRR) in Bethesda, Maryland, to present the status of the dewatering well cavity investigation and the proposed course of action for further investigation and dewatering well demobilization.

At the meeting, SCE agreed to provide to the NRC details of an expanded settlement observation program. The information is provided in the enclosed "Report on Settlement Observation Program, San Onofre Nuclear Generating Station, Units 2 and 3, March 22, 1978." Fifty copies of this report are provided for your use.

This same subject was addressed in NRC Round Two Question 362.14. The formal response to this question will be included in FSAR Amendment No. 9, to be submitted in late April, 1978. This response will reference the enclosed report.
