Attention: Mr. Karl Kniel, Chief
LWR Branch 2, DPM
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

On March 10, 1978, Southern California Edison (SCE) and our consultants met with members of the NRC Staff from the Auxiliary Systems, Geosciences, Hydrology and Structural Branches in Bethesda, Maryland to present a comparison of the Offshore Circulating Water System with the Standard Review Plan acceptance criteria and to describe the addition of the seismic Category I Auxiliary Intake Structure.

At the meeting SCE agreed to provide copies of these revisions to the NRC in order to facilitate a prompt review. Fifty (50) copies of the report, "Offshore Circulating Water System/Ultimate Heat Sink, San Onofre Nuclear Generating Station, Units 2 and 3" are provided for your review and use. An amendment to the San Onofre Units 2 and 3 FSAR, describing these revisions, will be provided by approximately May, 1978.

As indicated in the report, SCE is proceeding with the work as presented in the meeting and outlined in the report. The NRC will be kept advised of any major changes from the enclosed report.
