Subject: Response to USNRC Requests for Additional Information RAI 1-3, Emergency Preparedness Plan, from the Texas A&M University System, Texas Engineering Experiment Station, Nuclear Science Center Reactor (NSCR, License No. R-83, Docket 50-128)

To Whom It May Concern:

The Texas A&M University System, Texas Engineering Experiment Station (TEES), Nuclear Science Center (NSC, License No. R-83) operates a LEU, 1MW, TRIGA reactor under timely renewal. In December, 2003 the NSC submitted a Safety Analysis Report (SAR) as part of the license renewal process. In December, 2005 a conversion SAR (Chapter 18) was submitted resulting in an order to convert from the USNRC. In July 2009, the NSC submitted an updated SAR, dated June 2009, to the USNRC. This updated 2009 version of our SAR incorporated the information from the conversion SAR and the startup of the new LEU reactor core. On January 7, 2014 the USNRC submitted a Request for Additional Information re: Emergency Preparedness Plan as a part of the review process. Attached is our reply to these three questions.

If you have any questions, please contact Jerry Newhouse at 979-845-7551.

I declare under penalty of perjury that the foregoing is true and correct. Executed on February 11, 2014.
