2. Add clause H.20 "COPYRIGHT OF CODES - SPECIAL NUCLEAR PURPOSE LICENSE" in its entirety:

"H.20 COPYRIGHT OF CODES - SPECIAL NUCLEAR PURPOSE LICENSE

(A) The NRC may, pursuant to Section (c) of FAR Clause 52-227-14, direct the contractor to claim a copyright in computer software and associated data first produced in the performance of this contract. More specifically, the SNAP plug-ins for the following codes: TRACE, MELCOR (1.8.6 and 2.1), PARCS, RADTRAD, CONTAIN, FRAPCON, FRAPTRAN, and any future code

plug-ins that are directly developed with resources of the USNRC, unless SPECIFICALLY excepted, in a letter from an USNRC representative. In addition to the general government license rights identified in Section (c) of FAR Clause 52-227-14, such copyright shall be subject to the following Special Nuclear Purpose License rights:

In addition to the license rights granted the government under paragraph (c) of Section I of the contract, 52.227-14 RIGHTS IN DATA-GENERAL (JUN 1987), the contractor grants the NRC and others acting on its behalf an exclusive, paid up, worldwide, irrevocable license to distribute the specific plug-ins listed above for nuclear health and safety purposes, which may include analyses of operational, decommissioned, or designs of nuclear reactor systems and other such facilities involving nuclear technology performed by parties which may include but are not limited to licensees, vendors, contractors, educational institutions, public interest groups, participants in NRC international agreement programs and other government agencies. Further, consistent with NRCAR 2052.209-73 CONTRACTOR ORGANIZATIONAL CONFLICTS OF INTEREST, the contractor agrees that it will not sell or distribute the specific plug-ins listed above to or for the use of such parties or participants and that it will not provide technical services relating to these plug-ins to such parties or participants, unless authorized by NRC. In addition, NRC retains the right to improvements made to these plug-ins resulting from the contractor's commercial activity that the NRC contracting officer determines are of use for nuclear health and safety purposes. Further, the contractor agrees to include in any licensing agreement that it may enter into with a third party such limitations as are necessary to preserve the rights of the government, and limit the sale and distribution of the software as described above and as limited by the U.S. Departments of Commerce and State concerning foreign sales.

(B) The NRC reserves the right to direct the contractor to transfer the copyright in for the specific plug-ins listed above to successor contractors subject to the above general government and special license rights. Should NRC determine that it is in the government's interest to have NRC staff perform the software development and maintenance work required under this contract, the contractor agrees to maintain the copyright subject to the above general government and special license rights.
