Cc: Trautvetter, Jody R. (JR) (jrtrautvetter@energy-northwest.com)
Subject: Acceptance Review (TAC Nos. MF3435 and MF3562)

By letters dated February 6 and March 7, 2014, EN submitted relief requests 3ISI-14 and 3ISI-15, respectively, for CGS, to use the alternative inspection methods provided in Code Cases N-702 and N-805 for the remainder of the 3rd ISI Program Interval, ending on December 12, 2015.

The purpose of this letter is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of the relief requests. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it provides technical information in sufficient detail to enable the staff to proceed with its detailed technical review and make an independent assessment regarding the acceptability of the proposed relief requests in terms of regulatory requirements and the protection of public health and safety and the environment. If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence.
