Doug,

Here is the link to the reference that NRC referred to on the conference call yesterday. Len found it on the internet. It is part of Dr. LaGarry's dissertation which is made up of three reports. The one that covers the geology of those quadrangles may be found on pages 7 through 179. While it makes for interesting reading, I was unable to find any reference to the Niobrara River Fault, and the geology described for those quadrangles is well outside of the Marsland Area of Review.
