SUBJECT: SUMMARY OF FEBRUARY 24, 2014, CATEGORY 2 PUBLIC
MEETING WITH THE U.S. NUCLEAR REGULATORY
COMMISSION STAFF AND THE GENERAL PUBLIC TO
DISCUSS THE BASELINE SCHEDULE FOR LIGHT-WATER
SMR DESIGN CERTIFICATION REVIEWS (TAC No. Q00169)

On February 24, 2014, a Category 2 public meeting was held between the U.S. Nuclear Regulatory Commission (NRC) staff and the general public at the NRC offices at One White Flint North, 11555 Rockville Pike, Rockville, MD 20852, Room 1F16/1G16.

The purpose of this open meeting was to discuss the baseline schedule for the review of light-water small, modular reactor (SMR) Design Certification reviews developed by the Office of New Reactors (NRO), Division of Advanced Reactors and Rulemaking (DARR).

The meeting began with an NRC presentation of slides on the subject. The slide presentation was followed by a question and answer period in which members of the NRC staff and the public discussed particular aspects of the baseline review schedule.

The staff used the discussion opportunity to re-emphasize several key points. First, the NRC will not compromise safety to achieve review schedule success. Second, applicants need to submit a complete and technically sufficient application for the staff to be able complete the Acceptance Review process and to conduct a full Design Certification application review. Third, the staff noted that the baseline schedule was aggressive and that all of the assumptions listed in the presentation slides must be satisfied in order to achieve the baseline schedule targets.

The meeting notice and agenda are included in Enclosure 1. The list of meeting attendees is included in Enclosure 2.

The accession number for the meeting notice and agenda is ML14050A299, located in the NRC Agencywide Documents Access and Management System (ADAMS). The ADAMS accession number for the presentation slides is ML14050A063.
