Subject: RE: LIC 109 Acceptance review regarding TAC MF3352 and MF3353 Dresden 2 and 3 Inservice Inspection Program Relief Request 14R-17,

Importance: High

Mitch,

We found the letter dated December 30, 2013 (ML13364A361) acceptable for review per LIC 109. However, the review will require an extensive RAI.

The Submittal contained Relief Request IR4-17 for Dresden Nuclear Power Station, Units 2 and 3, ISI Program Relief Request Regarding Examination Coverage for the Fourth Inservice Inspection Interval.

The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it provides technical information in sufficient detail to enable the NRC staff to begin a detailed technical review and make an independent assessment regarding the acceptability of the proposed relief request in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

Please contact me if you have any questions. A copy of this email will be made publicly available in ADAMS.
