ARLINGTON, TX 76011-4511

March 25, 2014

Short/Dolan Investments, Inc.
d/b/a Pacific Island Inspection
ATTN: Levi E. Gardner
Radiation Safety Officer
3625 E. Ajo Way
Tucson, Arizona 85713

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION

The Nuclear Regulatory Commission (NRC) has initiated the technical review of your application and letter dated February 3, 2014 requesting authorization to add a new field station, and review of your revised operating and emergency procedures. The following deficiencies were identified. Please provide additional information as indicated below. Make reference to mail control number 583117 when providing your response.

1. The radiation safety officer (RSO) listed in condition 13 of the license is Levi. E. Gardner. The application and letter dated February 3, 2014 was signed by Christopher Dolan, alternate radiation safety officer and general manager. Confirm that Levi E. Gardner continues to be an employee of Short/Dolan Investments, Inc. and continues to be the radiation safety officer, or submit a license amendment request following the guidance provided in NUREG-1556, Volume 2, to change the RSO. This guidance document can be found at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v2/>.
2. The letter dated February 3, 2014 has a letterhead stating "Canyon State Inspection". Indicate if there has been a change of ownership or transfer of control of Short/Dolan Investments, Inc. by completing Appendix F of NUREG-1556, Volume 15 (enclosed).
3. The application requested to authorize a new field station. Provide the following information for the proposed field station.
 - A. Indicate whether radiography will be performed at the place of business outside of the field station as if the work was "in the field".
 - B. For radiography performed at the place of business outside of the field station as if the work was "in the field", provide a diagram of the location where radiography may be performed and its surroundings, including a description of adjacent property.
 - C. Confirm that all the increased controls measures are in place for the proposed field station.

4. The operating and emergency procedures submitted to the NRC continue to reference Models 660A and 660B cameras for use in industrial radiography. Please note that the Certificate of Compliance for SENTINEL™ Model 660 Series radiographic projectors expired on June 30, 2013 as described in NRC Information Notice 2013-08 (enclosed).
 - A. Update your operating and emergency procedures in accordance with the information provided in NRC Information Notice 2013-08, and resubmit to the NRC.
 - B. Provide decommissioning documentation and leak test results for the Models 660A and 660B cameras authorized in conditions 10.A. and 10.B. if these models have already been disposed. Request that conditions 10.A. and 10.B. be removed from the license.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Roberto J. Torres, Senior Health Physicist
Nuclear Materials Safety Branch B
