Re: General License Distribution Quarterly Distribution Reports

Good Afternoon GLTS:

It recently came to the attention of RMD Instruments Corp. that RMD Instruments Corp. had not sent some quarterly distribution reports to the NRC's GLTS. We are an instrument manufacturer in the State of Massachusetts, and distribute an x-ray fluorescence instrument that contains a 57Cobalt radioactive source. Massachusetts is an agreement state. Our company distributes the instruments to generally licensed sites under our Massachusetts General Distribution License **MA-53-0271**. Massachusetts laws refer to reporting requirements of the NRC.

Attached please find a full printed report of all --

- General License "transfers" January 2010 through December 2013 (sorted by date)
- General License "receipts" January 2010 through December 2013 (sorted by date)

In addition as a convenience a full printed report of all --

- General License "transfers" January 2010 through December 2013 (by serial number)
- General License "receipts" January 2010 through December 2013 (by serial number)

I also included on a "thumb drive" the above information in a Microsoft excel (*.xls) format. A spreadsheet may greatly reduce the data entry process into the GLTS system.

For this time period, RMD Instruments Corp. made, and continues to make, quarterly distribution reports to the individual States. Unfortunately, during a transition of employees, our company was in error and did not continue to send quarterly reports also to the NRC. One interpretation was that reports to the NRC were needed for the quarter starting July 2011. Another interpretation was that reports to the NRC were needed since the first quarter of 2010. In this letter we provide all transfers and receipts since 2010.

The instrument model is "LPA-1B" and has an initial activity of 12 millicurie of 57Cobalt isotope. The instruments are "transferred" as a new sale. A customer typically "resources" an instrument after approximately 2 years. Sometimes we receive -- "decommission" is our word on the spreadsheet -- a unit (take the source out) and either return the empty housing with no labels to the customer or use that housing here. Our word "decommission" corresponds to NRC regulations meaning of "receipt". The above data sorted by serial number is a quick way to verify "resourcing" shipments and the "storage site".

In addition as indicated on the report, fewer than 15 "Lead Tracer" models were transferred with an initial source activity of 15 millicurie of 57 Cobalt. Please feel free to contact me if you have any questions.

Sincerely,

PETER W. WAER

Peter Waer

A handwritten signature in dark ink, appearing to read 'Peter W. Waer', is written over the printed name.
