NUCLEAR REGULATORY COMMISSION**
REGION I
2100 RENAISSANCE BOULEVARD, SUITE 100
KING OF PRUSSIA, PA 19406-2713

March 12, 2014

Docket No. 03036004
Control No. 583144

License No. 44-28404-02

Peter Brooks
President
Infra-Red Analyzers, Inc.
65 Lyman Drive
Williston, VT 05495

SUBJECT: INFRA-RED ANALYZERS, INC., LICENSE AMENDMENT, CONTROL NO.
583144

Dear Mr. Brooks:

This refers to your license amendment request, dated January 21, 2014. Enclosed with this letter is the amended license. This Amendment adds a new facility and releases a previous facility. In the future be advised that you are required to notify us before the relocation takes place. Prior to the release of a facility for unrestricted use, you must receive an Amendment removing your current facility from your license. Include in the request the results of leak testing demonstrating that the levels of residual activity in the facility are acceptable. A review of your leaktest results confirmed that the facility was appropriate for release and would have been approved.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Thank you for your cooperation.

Sincerely,

Original signed by Michael Reichard
