What is the Statistical Abstract?

The *Statistical Abstract of the United States*, published since 1878, is the authoritative and comprehensive summary of statistics on the social, political, and economic organization of the United States.

Use the Abstract as a convenient volume for statistical reference, and as a guide to sources of more information both in print and on the Web.

Sources of data include the Census Bureau, Bureau of Labor Statistics, Bureau of Economic Analysis, and many other Federal agencies and private organizations.

The U.S. Census Bureau is terminating the collection of data for the Statistical Compendia program effective October 1, 2011. The Statistical Compendium program is comprised of the Statistical Abstract of the United States and its supplemental products - - the State and Metropolitan Area Data Book and the County and City Data Book. In preparation for the Fiscal Year 2012 (FY 2012) budget, the Census Bureau did a comprehensive review of a number of programs and had to make difficult proposals to terminate and reduce a number of existing programs in order to acquire funds for higher priority programs. The decision to propose the elimination of this program was not made lightly. To access the most current data, please refer to the organizations cited in the source notes for each table of the Statistical Abstract.

Sources of Data

The Abstract is also your guide to sources of other data from the Census Bureau, other Federal agencies, and private organizations.
