Subject: RE: Request concurrence of Dewey-Burdock License Condition 12.10

Tom,

We have reviewed the proposed license condition regarding sampling and analysis of all domestic, livestock and crop irrigation wells with 2 km of a well field boundary, as measured from the perimeter monitoring well ring, and concur with its inclusion in License SUA-1600.

Thanks for your assistance in completing the license conditions.

Subject: Request concurrence of Dewey-Burdock License Condition 12.10

Mr. Blubaugh and Mr. Mays,

As discussed, we request your concurrence of Dewey-Burdock License Condition 12.10 provided below.

Prior to commencement of operations, the licensee will collect four quarterly groundwater samples from each well within 2 km (1.25 mi) of the boundary of any wellfield, as measured from the perimeter monitoring well ring. This data shall be submitted to the NRC staff for review and written verification. Furthermore, all domestic, livestock, and crop irrigation wells within 2 km (1.25 mi) of the boundary of any wellfield, as measured from the perimeter monitoring well ring, will be included in the routine environmental sampling program provided that well owners consent to sampling and the condition of the wells renders them suitable for sampling.

Sincerely,

Tom Lancaster
