**Subject: Transmittal of Public Version of Licensing Topical Report NEDC-32992P-A**

References:

1. MFN 01-047 Letter: James Klapproth (GENE) to Document Control Desk (NRC), Transmittal of GE Proprietary Licensing Topical Report: NEDC-32992P-A, "ODYSY Application for Stability Licensing Calculations," September 13, 2001.

For the purposes of completing the reference records associated with the ESBWR DCD, GEH is submitting NEDC-32992, ODYSY Application for Stability Licensing Calculations. The proprietary Licensing Topical Report – NEDC-32992P-A was transmitted to the U.S. Nuclear Regulatory Commission, Document Control Desk, on September 13, 2001 in MFN 01-047 which included the "approved" version containing the NRC SER. This proprietary report is a 2001 document that, under the processes for submitting documents at that time, did not mark the proprietary content in the fashion of today's topical reports, consistent with more recent NRC guidance for submitting information. The non-proprietary version enclosed may be disclosed to the public.

If you have any questions concerning this letter, please contact Peter Yandow at 910-819-6378.

I declare under penalty of perjury that the foregoing information is true and correct to the best of my knowledge, information, and belief.

Sincerely,

Jerald G. Head  
Senior Vice President Regulatory Affairs  
GE-Hitachi Nuclear Energy Americas LLC
