May 31, 2006

Dear Ms. Sanders,

Elekta, Inc. hereby is submitting a sealed source and device application for a new Gamma Knife® unit. Please find attachments for your review.

The current brand name for the product is Perfexion™, however, several of the attachments refer to the project names as well.

Please note that the preventative maintenance schedule and acceptance testing are not yet completed at this time. These documents will be submitted as they are made available.

The 26 pt. leakage diagram according to NCRP 33 has not been developed at this point. Multiple leakage points have been taken around the unit and the unit is in compliance. Physics has not yet distilled out the 26 pts. That will be used. This will be submitted for your review as soon as it is available.

Should you have any questions or require additional information, please do not hesitate to contact me.

Best regards,  
ELEKTA, INC.

  
Martin Knotts  
Radiation Safety Officer
