

MEMORANDUM

TO: File

FROM: Bill Slocumb

BS

DATE: May 1, 1996

SUBJECT: Elekta Instrument SA.- Leksell Gamma System Model 23004 Type-B

Elekta Instruments, Inc. (Distributor) of Elekta Instrument SA.'s Leksell Gamma System Model 23004 Type B has verbally, and in writing requested that some of the specification type drawings, and components for this system be considered proprietary, and confidential information.

NOTE: In order to keep documentation in Chronological Order the confidential and proprietary information has not been removed from the binders in which it was submitted. Therefore, the binders referenced below have been filed in the confidential file but also contain information which is not considered confidential.

Binder containing the initial application dated November 27, 1991 contains confidential information in Section Nos. 1, 3, & 4. Note: This notebook also contains additional information which is not confidential and was reviewed as part of the device evaluation process.

Binder containing responses dated February 11, 1994 to letter dated January 14, 1993 contains confidential information in Section Nos. 3, 7, 9, 10, 11, 12, 13, & 14. NOTE: This notebook also contains additional information which is not confidential and was reviewed as part of the device evaluation process.

Binder labelled 2, 3, and 4 contains information in Section-J which is confidential or proprietary. NOTE: This notebook also contains additional information which is not confidential and was reviewed as part of the device evaluation process.
