Attention: Mr. Eric Jameson

Dear Mr. Jameson,

Elekta Instruments AB is in the process of developing a new Leksell Gamma Knife®. The trade name is yet to be defined, but currently, it is being referred to as Elekta Gamma Knife®. The design of the new device is sufficiently different such that a new source and device license will in all probability be required. I have enclosed preliminary documentation for your review:

1. Regulatory Submission File for Elekta Gamma Knife® (includes device description)
2. Compliance with Requirements (physics testing to date)
3. Timer and Emergency Stop Description
4. Instructions for Use (Draft manual)

In advance of the source and device application from Elekta, Inc., we ask that you please review these documents. We expect you to have questions and we ask that you supply Elekta with the specific questions you have in order to help us with the application process.

Thank you in advance for your help and cooperation with this. Please do not hesitate to contact Martin Knotts at 770.670.2433 or myself at 770 670.2548.

Sincerely

Peter Stegagno
Vice President, Regulatory Affairs and Quality Assurance
