Dr. Jacob D. Paz
5440 Count Carlson Circle
Las Vegas, NV 89119

Dear Dr. Paz:

We appreciate your interest in the United States Nuclear Regulatory Commission's (NRC's) activities related to the United States Department of Energy's (DOE's) application to construct and operate a high-level waste repository at Yucca Mountain, Nevada. The NRC is in receipt of your letter dated December 12, 2013, to Mr. Lawrence Kokajko in which you requested that the NRC add the information provided in the letter to the docket. Accordingly, your letter has been added to Docket 63-001 and can also be found in the NRC's Agencywide Documents Access and Management System at Accession Number ML14072A214.

To address your request that the hearings for DOE's license application be suspended, I would point out that there are currently no hearings scheduled. In response to the DOE's motion to withdraw its construction authorization application, the Commission directed the Atomic Safety and Licensing Board to suspend its adjudicatory hearings on the Yucca Mountain licensing application by the end of September 2011. On November 18, 2013, the Commission directed the staff to resume some activities related to the license review, but to continue to hold adjudication in abeyance.

Thank you for your input and continued interest in the NRC's regulatory process.

Sincerely,

/RA/

Josephine M. Piccone, Director
Division of Spent Fuel Alternative Strategies
Office of Nuclear Material Safety
and Safeguards.
