Subject: Docket ID NRC-2013-0077

I fully support the amended petition submitted by Mr. Lieberman for the reasons stated in my earlier comments on the initial proposed rulemaking that was limited to nuclear reactors.

It is equally important that the NRC staff have high confidence that legal framework for the information they are being provided to make regulatory decisions that do not involve the issuance of a license or license amendment be held to the same legal standards, for the submittal of complete and accurate information, as would a licensee or an applicant for a license.

I appreciate the opportunity to comment on this proposed regulation and if you have any questions please do not hesitate to call me at 301-442-3005.
