Dear Sir/Madam,

Attached please find a completed NRC Form 7, which serves as our application for amendment and renewal of our Export License XB1318, which currently expires November 30, 2014. Also attached please find a check for the application fee of \$9,500.

The renewal requests an extension of ten years from the date of expiration of our current license. The amendment corrects our company name, updates contact information, changes the consignee facility, raises the total activity we may export in relation to the increased licensing period, and generalizes the description of radioactive material in Block 10.

Please note that in 2010, Alaron Corporation merged into Veolia ES Alaron, LLC, doing business as Alaron Nuclear Services, hence, the change in our name. Veolia ES Alaron, LLC is a wholly owned subsidiary of Veolia Environmental Services, Technical Solutions, LLC.

We currently use our Export License to export tritium to a recycler in Canada through our local vendor. Recently, our vendor has changed the recycler in Canada to which we must send the materials, thus the change of consignee in the application. It is imperative that we be able to ship material to this new facility before May 22, 2014, in order to remain compliant with possession time constraints set forth in our Pennsylvania radioactive materials license. Therefore, we respectfully request that this application be expedited and/or interim approval be given to ship materials to the new facility (SRB Technologies (Canada), Inc.) while the application is out for public comment.

Please feel free to contact me at 724-535-5777 or via email at julian.owoc@veolia.com should you need further information or have any questions.

Thank you for your consideration of our application.

Sincerely,

Julian J. Owoc II
Radiation Safety Officer
