Subject: Duke Response to NRC RAI Letter 116

NRC RAI Letter 116 related to SRP sections 6.3 and 15.2.6 for Levy COLA was issued by you on March 6, 2014, and requested that Duke Energy respond within 30 days. Duke Energy is coordinating with Westinghouse to develop the responses to the 12 questions contained in the RAI letter; a meeting was held on March 18, 2014, with the NRC staff to review the questions and clarify the responses we intended to provide to the NRC.

We have determined that a complete response cannot be achieved within the 30 day requested period. We intend to provide responses to individual questions or sets of questions as soon as they are available. We have encountered some delays in Levy RAI response due to the need to resolve questions with Westinghouse regarding handling of proprietary data for Levy COLA. This will result in the initial RAI response being submitted one week later than originally projected. We currently project that the first response will be provided to the NRC by April 18, 2014, and the last response will be provided by June 11, 2014. Please contact me at 704-382-4046 if you have questions or need additional information. Thanks.
