Subject: Request for Continued Approval of the NAC International QA Program

Reference: Quality Assurance Program Approval for Radioactive Material Packages, Docket 71-0018, Revision 09

Dear Mr. Lombard:

NAC International Inc. hereby formally requests renewal of the referenced Quality Assurance Program Approval.

We attest that we have reviewed the NAC QA programmatic commitments as contained in our previous letters on this subject (most current was QA20040145 in November, 2004) and have confirmed that we have made no changes to the QA program that would lessen our quality controls or commitment.

In early 2013, corporate ownership of NAC was transferred from the United States Enrichment Corporation (USEC) to the Hitachi Zosen Corporation (HITZ). However, that ownership change has not resulted in any meaningful changes that affect the NAC organization or QA Program. As with most organizations our internal organization has continued to evolve to meet current business needs but no changes have been made that would interfere with the NAC QA organizations independence from cost and schedule concerns in assuring quality compliance. For awareness, we have attached a copy of our current organizational chart.

Should any additional information be required to support our request, please let us know and we will promptly respond.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Howard Smith'.

R. Howard Smith
Vice President, Quality
