Terry Matthew Dowell  
Radiation Safety Officer  
Black Panther Mining, LLC  
6594 W. State Route 56  
Petersburg, IN 47567

APR 04 2014

Dear Mr. Dowell:

Enclosed is Amendment No. 01 to your NRC Material License No. 13-35049-01 in accordance with your request. In this amendment, Subitem Nos. 6 through 9 have been changed to add "C" and Condition Nos. 11, 12 and 25 have been updated and/or corrected, as compared to the original license. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please contact me at (630) 829-9841 or (800) 522-3025, ext. 9841 if you have any questions. My fax number is (630) 515-1078.

*Please note that, for all future licensing correspondence, please refrain from submitting a manual-style "Radiation Safety Program" for each amendment request, especially when it constitutes much more information than is appropriate and becomes superfluous. The level of detail we expect and types of information needed can be found in NUREG 1556, Vol. 4, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Fixed Gauge Licenses," on our website at: <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v4/>. Using this guidance will help ensure that your licensing applications are complete without being onerous and will reduce your regulatory burden.*

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
