Steve,

The Confidential statement on our Engineering Evaluation Report is standard on all of our forms. In this case, it is acceptable to release the EER for public use. Please let me know if you have any further questions.

**Subject:** United Controls International Part 21 Report of 4/9/2014 - Marked Confidential and Proprietary

Dear Mr. Garrison,

I am reviewing UCI's Part 21 submittal dated 4/9/2014 entitled "10CFR21 Interim Letter, UCI Not Capable to Determine if Defect Exists General Electric SB1 Switches and HEA Relays." In the interest of transparency and nuclear safety, the NRC attempts to make all Part 21 reports publicly available. We also will publish all Part 21 reports to the NRC public website. At this time however, we cannot publish the subject UCI Part 21 report, as five pages of the six page "Engineering Evaluation Report" that was transmitted to the NRC are marked "CONFIDENTIAL AND PROPRIETARY DOCUMENT: Do not disclose to third party without express written consent from United Controls" at the bottom of these pages.

The NRC provides licensees and vendors with a mechanism for withholding reports containing confidential and proprietary information from public release. If the information

provided in your Engineering Evaluation Report is indeed Confidential and Proprietary to UCI, then you must provide us with the required information and follow the procedure described in 10CFR2 Section [2.390 Public inspections, exemptions, requests for withholding](#) so that we can properly consider your withholding request. If the information in the "Engineering Evaluation Report" is not Confidential and Proprietary, and /or can be made publicly available, then you can send me an email message indicating that the information provided in the UCI Part 21 Report and Engineering Evaluation is not Confidential or Proprietary, and that this Part 21 report (which will be identified in the NRC Agencywide Documents Access and Management System (ADAMS) with Accession Number ML14101A342) can be made publicly available.

Please let me know which of these two approaches you wish to follow. If you have any questions you can call me at 301-415-4083. Thank you for your assistance.
