U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

**American Centrifuge Plant and Lead Cascade Facility  
Docket Numbers 70-7004 and 70-7003; License Numbers SNM-2011 and SNM-7003  
Termination of Facility Code 11560**

Dear Ms. Haney:

The purpose of this letter is to request the U.S. Nuclear Regulatory Commission (NRC) to terminate Facility Code 11560 previously designated for the American Centrifuge Plant (ACP) and American Centrifuge Lead Cascade Facility (Lead Cascade).

On January 19, 2011 (Reference 1), the NRC issued a favorable Foreign Ownership, Control, or Influence (FOCI) determination for the American Centrifuge Operating, LLC (ACO). The Facility Code assigned to ACO was 8759. On January 31, 2013 (Reference 2), the U.S. Department of Energy determined that ACO has a need for use of Restricted Data in its business and therefore, issued Revision 2 of Access Permit 11-04. On February 8, 2013, the Materials Licenses for the ACP and Lead Cascade were transferred to ACO (Reference 3) and ACO was granted a facility security clearance to use, process, store, reproduce, and handle classified matter up to an including Secret-Restricted Data (Reference 4). ACO will continue to:

- Manage, operate, and maintain the ACP and Lead Cascade, including decontamination and decommissioning activities;
- Hold the sublease needed for operations of the ACP and Lead Cascade;
- Have intercompany agreements with affiliates; and
- Possess and control the centrifuge machines, uranium, the Lead Cascade, the ACP, and any other licensed facilities and materials.

Based upon the above information, classified matter is no longer possessed by Facility Code 11560; therefore, termination of Facility Code 11560 is requested at the NRC's earliest convenience.

American Centrifuge Operating, LLC  
3930 U.S. Route 23 South - P.O. Box 628  
Piketon, OH 45661

115501
