

April 25, 2014

Mr. Masahiro Aoki  
Director  
International Affairs Division  
Nuclear Regulation Authority  
1-9-9 Roppongi 1<sup>st</sup> Bldg. 2F  
Minato-ku, Tokyo 106-8450  
Japan

Dear Mr. Aoki:

It was a pleasure to see you during the U.S. Nuclear Regulatory Commission (NRC)'s Regulatory Information Conference in March 2014. On the margins of the NRC - Japan Nuclear Regulation Authority Steering Committee meeting, we mentioned the finalization of the NRC's review of the structural analyses performed to confirm the integrity of the spent fuel pool within the damaged Unit 4 reactor building at the Fukushima Dai-ichi facility. The enclosure to this letter summarizes the NRC staff's assessment of the analyses performed by Tokyo Electric Power Company and Japan Nuclear Energy Safety Organization, and the conclusion that the actions taken and analyses performed were reasonable and adequate to address the immediate safety concerns over the structural integrity of the spent fuel pool. If you have any questions, please feel free to contact me.

Sincerely,
