Attachments: 435-B NRC Call 4-9-14.pdf

Norma,

The attached file contains the responses you and your team requested during our April 9, 2014 teleconference.

Please review and let me know if this provides the information you and your team need, and if it accurately describes the SAR changes you and your team believe are needed. AREVA is prepared to make the necessary SAR page changes, as soon as I get concurrence from you on the SAR changes proposed in the attached file. Therefore, please let me know if the information provided meets your need or if it doesn't meet your need, please tell me what else you and/or your team need me to provide.

As I have stated before, NNSA needs the 435-B package certified as soon as possible to enable it to perform its threat reduction mission.

Thank you.

R/Max
