Docket No. 03038168
Control No. 582568

License No. 19-31389-01

William Wainger
CEO
T.L.B. Associates, Inc.
7280 Baltimore-Annapolis Blvd.
Glen Burnie, MD 21061

SUBJECT: T.L.B. ASSOCIATES, INC., LICENSE AMENDMENT, CONTROL NO. 582568

Dear Mr. Wainger:

This refers to your license amendment request. Enclosed with this letter is the amended license.

By the letter dated November 12, 2013, T. L. B Associates, Inc. (TLB) submitted a notice to the U.S. Nuclear Regulatory Commission (NRC) informing it that TLB had been sold to Soil and Land Use Technology, Inc (SALUT) and request for approval of a new Radiation Safety Officer (Agencywide Documents Access and Management System (ADAMS) Accession No. ML13338A308.) The NRC staff treated the notification as a request for NRC consent to the indirect transfer of NRC Materials License No. 19-31389-01. Based on the information you provided, we understand that as a result of a stock sale between SALUT and Thomas Brown, control of TLB was *indirectly* transferred to SALUT on or about August 27, 2012. We further understand that this transfer did not result in any change to the licensed name, licensed materials, persons using the license material, or location of use of licensed material, but has resulted in a change to the Radiation Safety Officer.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report which documents the NRC staff's review of the request, the NRC consents to the transfer of control. Enclosed with this letter is the amended license documenting the new Radiation Safety Officer.

An environmental assessment for this action is not required since the NRC's consent to a transfer of control is categorically excluded from further environmental review requirements under 10 CFR 51.22(c)(21), and the NRC's approval of the Radiation Safety Officer is categorically excluded from further environmental review under 10 CFR 51.22(c)(10)(iv).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

In accordance with 10 CFR 2.390 of the NRC's "Agency's Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

Thank you for your cooperation.

Sincerely,

Original signed by Dennis R. Lawyer
