PLANT NAME: San Onofre Nuclear Generating Station, Unit Nos. 2 and 3
LICENSING STAGE: OL
DOCKET NUMBERS: 50-361/362

DESCRIPTION OF RESPONSE: Acceptance Review of Environmental Report
REQUESTED COMPLETION DATE: December 30, 1976
REVIEW STATUS: Additional Information Needed

We have completed our acceptance review of the radwaste systems and cost-benefit analysis sections in the Environmental Report for San Onofre Nuclear Generating Station, Unit Nos. 2 and 3, and find they are approximately 95% complete. We recommend that the application be accepted for review.

The meteorological information noted in the applicant's letter dated November 30, 1976, however, is scheduled to be submitted in April 1977. This information is needed in order to complete the Appendix I evaluation. The environmental review schedule for inter-branch inputs and for ETSB inputs to the DES should consider the April 1977 date.
