

June 13, 2014

Mr. William H. Allerton, Director  
Division of Dam Safety and Inspections  
Federal Energy Regulatory Commission  
Office of Energy Projects  
888 First Street, NE  
Washington, DC 20426

SUBJECT: OCONEE NUCLEAR STATION, UNITS 1, 2, AND 3 – ASSESSMENT OF  
SUPPORTING DOCUMENTATION RELATED TO THE FLOOD HAZARD  
REEVALUATION REPORT

Dear Mr. Allerton:

By letter dated May 15, 2014 (Agencywide Document Access and Management System (ADAMS) Accession No. ML14139A174), Duke Energy submitted additional documentation developed by an independent review party in support of the March 12, 2013 Oconee Nuclear Station (ONS) Flood Hazard Reevaluation Report (ADAMS Accession No. ML13079A227). The May 15, 2014 submittal includes the report titled "Validation of HRR Breach Hydrograph for Jocassee Dam" which contains sensitive security information that must be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* 2.390(d). Based on discussions between the U.S. Nuclear Regulatory Commission (NRC) and the Federal Energy Regulatory Commission (FERC), the NRC staff is requesting that FERC review the enclosed report and perform an acceptability assessment of the Jocassee breach analysis. In addition, to support your review of this report, in the near future we will be forwarding you the results of our contractor's review of the Xu/Zhang methodology referenced in this report.

If you have any questions, please call me at 301-415-2752.

Sincerely,

/RA/

Kenneth J. Karwoski  
NRC Dam Safety Officer  
Office of Nuclear Reactor Regulation

Docket Nos. 50-269, 50-270, and 50-287

Enclosure: As stated
