Dear Ms. Tichler:

As requested by your letter dated February 18, 1993, Carolina Power & Light Company (CP&L) has reviewed Brookhaven National Laboratory's (BNL) summary data regarding radioactive effluents released by the Brunswick Steam Electric Plant (BSEP) for 1991. Corrections and/or comments to the report are indicated by handwritten notes on the enclosed copy of the report. (Specifically, pages 26 and 30 have been corrected as a result of adding the radionuclides from abnormal releases into the appropriate sections of the Tables.) Carolina Power & Light Company understands that this summary data is to be used for inclusion in the BNL report of radioactive effluents released from commercial nuclear power plants during 1991 which is being prepared under contract with the Nuclear Regulatory Commission.

Also, your letter requested that CP&L indicate whether volumes reported were before or after compaction when solid waste was shipped to a licensed waste processor for volume reduction. Please note that all volumes reported were after compaction.

Thank you for the opportunity to review and comment on the summary data prior to finalization of the BNL report. If you have any questions, please call Mr. D. B. Waters at (919) 546-3678.

Yours very truly,
