Subject: Comments on Proposed Generic Communication - 10 CFR 50.54(p) Process for
Changes to Security Plans Without Prior NRC Approval (60 FR 31326, June 14,
1995)

Dear Sir:

Carolina Power & Light Company (CP&L) appreciates the opportunity to provide comments on the proposed generic communication to clarify the 10 CFR 50.54(p) process for changes to security plans without prior NRC approval (60 FR 31326, June 14, 1995).

CP&L supports the proposed clarification of the language in 10 CFR 50.54(p) and compliments the NRC for taking this action. CP&L also fully endorses the Nuclear Energy Institute (NEI) comments on the proposed generic communication. CP&L requests that the NRC take action to publish the proposed generic letter in final form as soon as possible. The proposed clarifications of the 10 CFR 50.54(p) process for changes to security plans without prior NRC approval will further facilitate safe, reliable, and economic nuclear power plant operation by enabling the elimination of security plan commitments that are in excess of regulatory requirements and are no longer considered of value relative to their cost.

Sincerely,

R. E. Rogan

Manager, Nuclear Licensing and Regulatory
Affairs
