United States Nuclear Regulatory Commission  
Washington, DC 20555

H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2  
DOCKET NO. 50-261/LICENSE NO. DPR-23  
REQUEST FOR LICENSE AMENDMENT  
REPORTING REQUIREMENTS OF 10 CFR 50, SECTIONS 50.72 AND 50.73

Dear Mr. Varga:

SUMMARY

As requested by Generic Letter No. 83-43 and in accordance with the Code of Federal Regulations, Title 10, Sections 50.90 and 2.101, Carolina Power & Light Company (CP&L) hereby requests revisions to the Technical Specifications (TS) for the H. B. Robinson Steam Electric Plant Unit No. 2 (HBR2). These revisions are as a result of the revised reporting requirements of 10 CFR 50, Sections 50.72 and 50.73.

DETAILS

Section 50.72 of Title 10 of the Code of Federal Regulations has recently been revised and a new Section 50.73 has recently been added. Both became effective January 1, 1984. Section 50.72 revises the immediate notification requirements for operating nuclear power reactors. The new Section 50.73 provides for a revised Licensee Event Report system. Paragraph (g) of Section 50.73 specifically states that "the requirements contained in this section replace all existing requirements for licensees to report 'Reportable Occurrences' as defined in individual plant Technical Specifications." Therefore, CP&L has revised the HBR2 TS accordingly.

SIGNIFICANT HAZARDS DETERMINATION

Carolina Power & Light Company has reviewed this request and has determined that the proposed TS revisions involve no significant hazards considerations because the proposed changes make the TS conform to changes in the regulations. The Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 for no significant hazards considerations by providing certain examples published in the Federal Register on April 6, 1983 (48 FR 14864). One of the examples of an amendment which will likely be found to involve no significant hazards considerations is a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations. The attached proposed changes fall within the Commission's example (vii) of a change not likely to involve a significant hazards consideration.

ADMINISTRATIVE

Since these revisions were requested by NRC staff in Generic Letter No. 83-43, CP&L has determined that no license amendment fee is required.

The affected pages are attached for your use. Changes are denoted by vertical bars in the right margin.

If you have any questions concerning this request, please contact a member of our Nuclear Licensing Staff.

Yours very truly,

A. B. Cutter, Vice President  
Nuclear Engineering & Licensing
