REACTOR VESSEL UPPER SHELF ENERGY FOR REACTOR VESSEL CORE
REGION PLATE MATERIALS

Gentlemen:

The purpose of this letter is to fulfill the commitment to the NRC by Carolina Power & Light Company (CP&L) in a conference call on December 13, 1993, regarding the subject of upper shelf energy of core region plates.

As agreed in the conference call, Westinghouse has submitted the enclosed letters which report results of revised calculations of the Westinghouse Owners' Group Report WCAP-13587, Revision 1, which had been previously transmitted to the NRC via NUMARC on September 30, 1993. The Westinghouse letters take into consideration those items which the NRR proposed in the conference call and provides additional information discussed in a December 17, 1993, conference call. CP&L has reviewed and concurs with the findings and conclusions of the amended WCAP.
