H. B. ROBINSON STEAM ELECTRIC PLANT, UNIT NO. 2
SUMMARY OF CHANGE TO TECHNICAL REQUIREMENTS MANUAL

Purpose, Description, and Justification for the Change

The Technical Requirements Manual (TRM) references specific procedures for the Corrective Action Program (CAP). Corporate procedure CAP-NGGC-0001, "Corrective Action Management," will be replaced later this year with another procedure. Additionally a reference remains in the TRM to superceded procedure PLP-026, "Corrective Action Management," which has been replaced by CAP-NGGC-0001, "Corrective Action Management." This change renames all these references to a generic title "Corrective Action Program."

This change does not involve any change to the systems, structures, or components described in the Safety Analysis Report. Since the existing Corrective Action Program procedure, the superceded procedure, and the new corporate procedure implements the requirements of 10 CFR 50, Appendix B, Criterion XI, "Corrective Action," and the change does not affect the actions taken as described in the TRM.

This change was approved in accordance with 10 CFR 50.59, which determined that the change did not result in a change to the operating license. Technical Specifications, or an unreviewed safety question, and the change was reviewed and accepted by the Plant Nuclear Safety Committee.
